

Denyo's

Servo Drive Unit

For Stationary Spot Welding Machine

Free Setting of Electrode Force

Improvement of Welding Quality

**Free Setting
of Electrode Stroke**

Reduction in the Cycle Time

Quietness of Working Sound

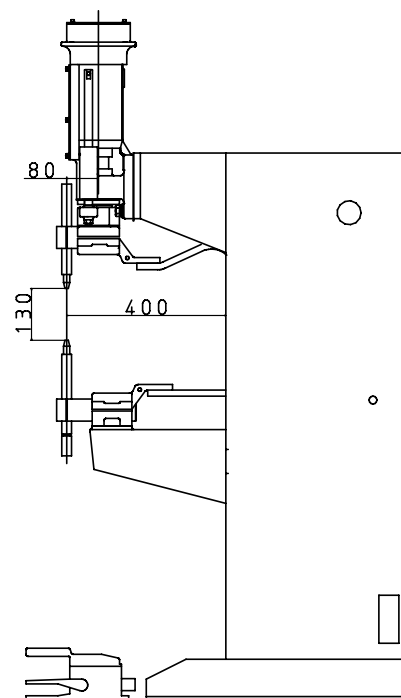

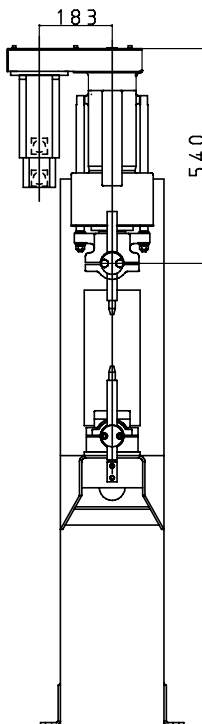

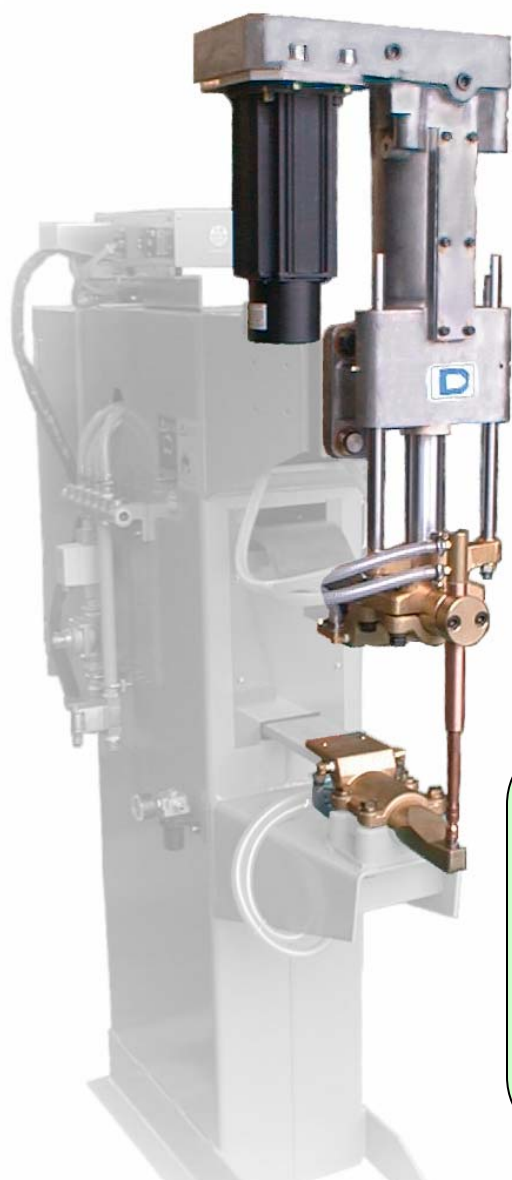

Reduction in Spatter

Soft Touching of Electrodes on the Work Piece

Denyo North America Inc.

Installable to any maker's servo motors and
stationary welding machines!!

Basic Specifications

TYPE	TMC-171 Series
Electrode pressure	5880 N (600 kgf)
Electrode stroke	130 mm MAX 150 mm
Electrode speed	656 mm/sec
Weight(drive unit)	50kg
